

SRCSC WG6: Science User Engagement

Thursday, 1 June 2023 12:00 (15 minutes)

The working group 6 of the SRC Steering Committee deals with Science User Engagement, providing feedback from the Science community to SKAO, in particular the Agile teams. A new JIRA ticketing system was set in place, and I will describe the process for feedback. Feedback can be made from Science Working Group representatives, WG6 members, and potentially external science users.
